EDUCATION

Next Generation Technological College — Angeles City
Senior High School — 2024 – Present

Diosdado Macapagal High School — Angeles City
Junior High School — 2020 – 2024

Dolores Piring Elementary School — Angeles City
Elementary — 2013 – 2020

EXPERIENCE

Independent Software Projects — Angeles City
Frontend Web Developer — 2024 – Present

- Built responsive, mobile-first sites and an installable attendance web app, Scholog, using HTML5, CSS3, JavaScript, and Supabase.
- Worked across interface design, navigation, database integration, and deployment on Vercel.

Academic & Personal Programming Work — Angeles City
C++ Programmer — 2025 – Present

- Wrote eight C++ console exercises covering card and PIN checks, record management, arithmetic, and geometry.
- Practised transaction state and control flow; documented known validation and memory bugs in the project case studies.
- Used the work to practise control flow, vectors, basic arithmetic, and formatted console output.

No formal employment yet — actively seeking an internship (OJT) or first junior developer role.

PROJECTS

Scholog — Student & Attendance Tracker — 2025 – Present

- Installable web app for teachers: manage sections and rosters, take daily attendance, and export PDF reports.
- Teachers work with a local cache and queued edits; students check in via QR or ID when a live session is available.
- Front end in HTML, CSS, and JavaScript; Supabase and PostgreSQL for authentication, records, and attendance data.

C++ ATM Simulator — 2025

- Console ATM with hard-coded card and PIN checks, balance, deposits, and withdrawals; the known withdrawal bug is documented.

C++ Student Grade Management System — 2025

- Prototype for student records, semester averages, and pass/fail output; the uninitialized vector-size bug is documented.

Other C++ Console Programs — 2025

- Cashier simulator, student honor status calculator, 2D & 3D shape calculator, Celsius–Fahrenheit and number-base converters, and a four-operation calculator.

TECHNICAL SKILLS

Languages: C++, JavaScript, HTML5, CSS3
Backend & data: PHP, Supabase, PostgreSQL
Tools: Git & GitHub, VS Code, Vercel

ADDITIONAL

Availability: Open to OJT / internship and entry-level junior developer roles.
Languages: Filipino (native), English (fluent)
